

An Invitation Letter for
The 7th Guangdong Aluminum Processing Technology
(International) Seminar, 2016

To: related industries

We have had 6 sessions under the name of The Guangdong Aluminum Processing Technology (International) Seminar in since 2010. During the seminars, we adhere to the tenet of serving the industries with Guangdong as the base while with a view to the whole country as well as the world. We have extensively to link the backbone enterprise of the industry, famous specialists, scholars and highly experienced technicians together. We have held seminars for people to exchange forefront technology, common technical problems and practical operational technique and skills. We've set up this platform for industries related to aluminum processing, technology, facilities and accessory production to exchange ideas with one another, study for promotion and cooperate in innovation. According to our statistics, in the past six sessions, there were 7500 people attending the seminar, 895 theses issued, among which 85 were rated excellent ones, and 245 reports were presented within our 43 technological workshops. Thus the Guangdong Aluminum Processing Technology (International) Seminar has proved itself a grand seminar of domestic aluminum processing industries for them to learn forefront technology, promote new technology, exchange experience and technique and show their products.

In 2015, despite the complex difficult economic situation at home and abroad, the aluminum processing industry in our country kept on developing as steadily and healthily as usual and maintaining a good tendency in non-ferrous metal industry. 2016 is the first year of the 13th Five Year Plan of China. Although the economic development status in China is steady, the serious shortage of market demand for aluminum products and the highlight rising surplus of aluminum processing are obvious. While at the same time, the requirements from society for environment protection and quality of products are higher and higher, and the original structure of the industry is about to face a change. How can we break through the stagnant status and update this industry through creative thinking and technology innovation? To answer the question, the 7th session of the Guangdong Aluminum Processing Technology (International) Seminar will be held in Nanhai, Guangdong province, on November 12, 2016. We intend to discuss the hot and difficult problems related to present aluminum processing technology and explore the standpoint and developing direction of the industry during its transformation and upgrading.

Seminar Descriptions:

1. Time and place

Conf. Hours: 09:00 - 17:30 Nov.12, 2016

Registration: 14:00 - 19:00 Nov.11, 2016

08:00 - 09:00 Nov.12, 2016

Place: Classical Plaza Hotel

Location: Le'an Section, Guidan Rd., Nanhai Luocun, Foshan City, Guangdong Province

(Close to Zhongnan Agriculture Trading Centre)

2. Themes

Creation, Promotion and Transformation

3. Sponsors

The Organizer:

Guangdong Provincial Nonferrous Metals Society
Aluminium Processing Committee

The Co-organizers:

Guangdong Non-ferrous Metals Institute
Guangdong Non-ferrous Metals Industry Association

Foshan Nanhai Aluminium Profile Association

Guangdong Nanhai Pengbo Information Co., Ltd.

Media sponsors:

www.albiz.cn

al-processing

Journal designated:

4. Key activities

We will invite leaders from the national industrial association to reports on policy explanation, invite leaders from the state industrial association to analyze the state policies, invite professional experts and scholars to introduce new technology and craftsmanship, and excellent engineers and technicians from production lines to share their experience and solutions to hot topics and difficult problems on process engineering, production skills and management. We'll also conduct some business tours to advanced enterprises of the industry and activities as golf friendship tournament.

5. Other Issues

5.1 Seminar paper collection

The general assembly will compile a collection named 2016 Thesis Collection of The 7th Guangdong Aluminum Processing Technology (International) Seminar. Outstanding thesis collected and archived will be recommended to A Aluminum Monograph (ISSN: ISSN 2313-4879) for publication in priority. The first author can get one copy of it. At the same time, 20 distinctive papers will be selected and awarded by the assembly and their authors can be arranged to make a speech in the meeting and exchange ideas with others. To those who have presented thesis to the conference for years, the authors will be honored and commended.

Topic scope of essays

1. On the application status of aluminum and its development direction in construction, rail transit, aviation, electronic appliances and packaging.
2. Topics on exploration of new technology, new technique, new crafts or new equipment technology in aluminum processing industry (melting, extrusion, rolling, die casting and surface treatment, mold manufacturing, door and window processing, etc.)
3. About energy saving and emission reduction in aluminum processing, or clean production technology, such as waste gas or waste water control and treatment, energy saving or water saving, or advanced technology for recycling;
4. On development and application of new materials of aluminum and aluminum alloy;
5. Related to equipment innovation of aluminum processing or related technology applications of its auxiliary materials;
6. About production management, ERP management or idea sharing on common problems in this industry.

Paper requirements

1. Papers must be composed with Microsoft Word. Plagiarism is strictly prohibited. The author must take the responsibility related. Please write company names in the text with the unified form: a certain company or XX company instead of a company;
2. The content must be of practicability (with value for scientific research or production), economical efficiency (to be effective in reducing costs, improving quality, increasing the variety, or improving the economic efficiency of enterprises etc.) and innovation. Review papers must have the function of guidance.
3. The number of words of a paper generally shall not be more than 5000. Brief abstracts of the essay in both Chinese and English as well as a brief instruction of the first author must be attached (including name, executive title, professional title, employer, contact address, telephone number, E-mail, etc.).

Deadline for essays

The deadline for submitting essays is on September 30th, 2016. Please e-mail your essay receipt to the conference affairs service group before August 31 and the full essay before September 30. The e-mail address is: alpc@alpc.org.cn. Please mark "essay" as your mail title or subject.

5.2 Seminar cooperation

The assembly can provide limited support services for the aluminum processing enterprises and the relevant units to carry out publicity and promotion. The first applicants may get the service first. Welcome for further information.

Co-organizer:  Guangdong Nanhai Pengbo Information Co., Ltd.

5.3 Seminar Registration

No registration fee and conference fee will be charged on the participants, and the organizers will offer food for all during the conference, but participants have to cover your own accommodation and transportation expenses.

6. Means for Seminar secretariat contact

For participation and cooperation, please contact:

Guangdong Nanhai Pengbo Information Co., Ltd.

The national service hotline: +86 4008-602-168

Contacts: Wu Chuqian, Chen Minhong

Tel.: +86 757 81188070 ext.800 or 822, +86 18934377070

Fax: +86 757 81188071

Address: Floor16, Junxiang Building, Jiaxia Section, Guangfo Rd, Dali Town, Nanhai District, Foshan City

**Paper collection: ALPC Secretariat of Guangdong Provincial Nonferrous Metals Society
Aluminium Processing Committee**

Contacts: Peng Xiayan, Guan Weijie

Tel.: +86 757 83689928, 83689986

Fax: +86 757 83689968, 83689936

Address: 2nd floor, the Non-ferrous Metal Technology Innovation Center, Guihe Road, Dali Town, Nan Hai District, Foshan City

We sincerely invite you to attend!
